

# Explainability Report

We report the following SageMaker analysis.

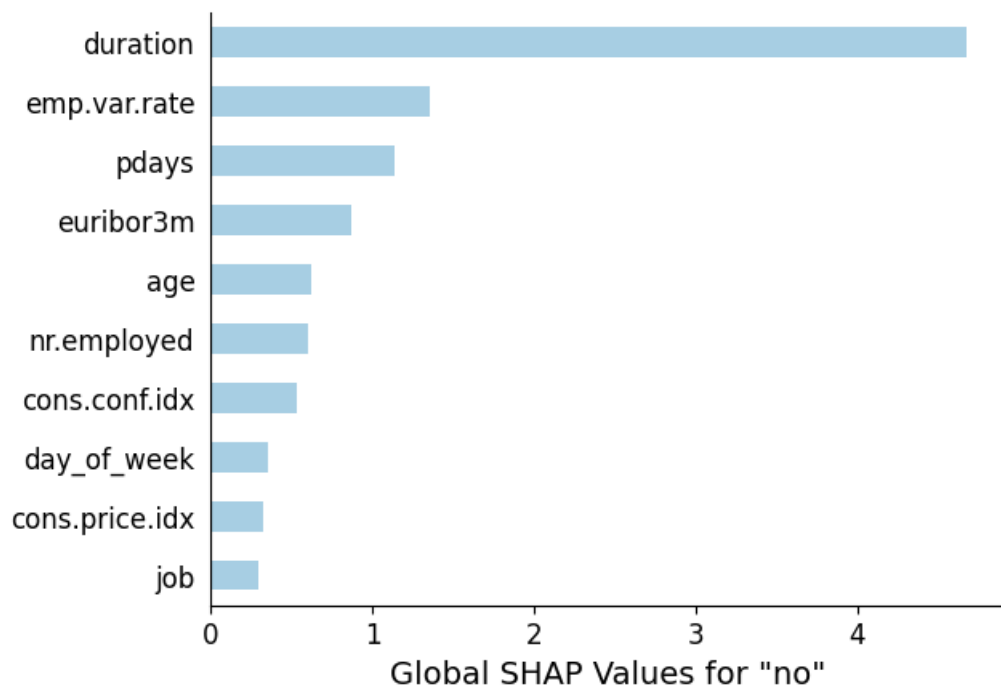

## Explanations for all labels

The Model has 20 input features and 2 output labels. We computed KernelShap on the dataset and display the 10 features with the greatest feature attribution summed up over all the labels.

## Explanations for "no"

The Model has 20 input features. We computed KernelShap on the dataset dataset and display the 10 features with the greatest feature attribution.

## Explanations for "yes"

The Model has 20 input features. We computed KernelShap on the dataset dataset and display the 10 features with the greatest feature attribution.
